

Cisco Aironet 1040 Series Access Points

<p>Performance with Investment Protection</p> <ul style="list-style-type: none"> • Six times faster than 802.11a/g networks • Backward-compatible with 802.11a/b/g clients
<p>Easy Installation and Power Efficient</p> <ul style="list-style-type: none"> • 802.11n performance with existing PoE switches • Sleek design blends into a variety of indoor environments
<p>Secure Interoperability</p> <ul style="list-style-type: none"> • 802.11n compliant • Intel Connect with Centrino Certified
<p>Simplified Network Management</p> <ul style="list-style-type: none"> • Controller-based or standalone deployment options
<p>Secure Connections</p> <ul style="list-style-type: none"> • Supports rogue access point detection and denial of service attacks • Management frame protection detects malicious users and alerts network administrators
<p>Greater Network Capacity</p> <ul style="list-style-type: none"> • Dynamic frequency selection 2 (DFS-2) compliant
<p>Easy-to-Install, Multipurpose Mounting Bracket</p> <ul style="list-style-type: none"> • Designed for easy replacement of existing access points • UL 2043 plenum rated for above ceiling installation options or suspended from drop ceilings • Locks for theft protection

The Cisco® Aironet® 1040 Series Access Point is an enterprise-class, entry-level 802.11n access point designed to address the wireless connectivity needs of small and medium-sized enterprises.

Business Ready 802.11n Performance

With 2x2 multiple-input multiple-output (MIMO) technology providing at least six times the throughput of existing 802.11a/g networks, the Cisco Aironet 1040 Series offers the performance advantage of 802.11n enterprise-class quality at an entry-level price for small and medium-sized enterprises.

As part of the Cisco Unified Wireless Network, the 1040 Series provides low total cost of ownership and investment protection by integrating seamlessly with the existing network.

RF Excellence

Building on the Cisco Aironet heritage of RF excellence, the 1040 Series delivers secure and reliable wireless connections. Enterprise-class chipsets and optimized radios deliver a robust mobility experience with:

- Optimized antenna and radio designs: Consistent network transmit and receive for optimized rate versus range
- Radio resource management (RRM): Automated self-healing optimizes the unpredictability of RF to reduce dead spots and help ensure high-availability client connections
- [BandSelect](#) improves 5-GHz client connections in mixed client environments
- [VideoStream](#) uses multicast to improve rich-media applications

Environmentally Responsible

Designed for sustainability, the Cisco Aironet 1040 Series offers 802.11n performance with standard 802.3af Power over Ethernet (PoE). At only 12.95 watts of power, the 1040 Series combines the power of dual-radio 802.11n with the efficiency of standard PoE. The sleek industrial design of the 1040 Series blends seamlessly into any indoor enterprise environment.

For quicker staging and installation, you can order the 1040 Series in multiunit eco-packs, which offer 10 controller-based or 5 standalone access points in a single, easy-to-open carton. Eco-packs reduce product packaging by 50 percent, preserving natural resources and reducing emissions. By eliminating unnecessary components and offering digital instead of paper documentation, the 1040 Series eco-packs will save over 2200 trees per year, which is equal to the amount of power required to heat over 65 homes for an entire year.

The Cisco Aironet 1040 Series is a component of the Cisco Unified Wireless Network, which can scale to up to 18,000 access points with full Layer 3 mobility across central or remote locations on the enterprise campus, in branch offices, and at remote sites.

Cisco Aironet 1040 Series Access Points come with a Limited Lifetime Hardware Warranty that includes 10-day advance hardware replacement.

Product Specifications

Table 1 lists the product specifications for Cisco Aironet 1040 Series Access Points.

Service and Support

Realize the full business value of your Cisco® Unified Wireless Network more quickly with intelligent, personalized services from Cisco and our partners. Cisco Services offer proven wireless architectures aligned to your business goals and tightly integrated with media-rich, real-time mobility applications. With our breadth and depth of expertise, we support your success every step of the way as you deploy, manage, and scale integrated wireless solutions for optimized performance, security, and management. Sharing knowledge and leading practices, we can help you create a secure, mobile, and interactive business environment to provide a foundation for innovation, agility, and differentiation.

Cisco recommends the following services for the Cisco Aironet 1040 Series Access Points implementation:

Cisco Wireless LAN 802.11n Readiness Assessment Service

Prevent common challenges and reduce deployment costs by determining the readiness of your wired and wireless infrastructure.

Cisco Wireless LAN 802.11n Migration Service

Simplify the migration to high-performance, next-generation 802.11n.

Cisco Wireless LAN Optimization Service

Evolve your 802.11n network to meet ever-changing network demands through planning and assessments, design, performance tuning, and ongoing support for system changes.

For more information about Cisco 802.11n planning and deployment services, visit:

<http://www.cisco.com/go/wirelesslanservices>.

For More Information
